**Additional Considerations**

- Each additional vending machine will require approximately 1.5m<sup>2</sup> of additional area as well as associated services.
- Sufficient clearance is required around the machines for manoeuvring in the case of removal for maintenance, repair or replacement. Bulkheads and joinery surrounds may be provided to prevent users from tipping or shaking machines but should be designed to allow for access for repairs and maintenance or be removable.
- Vending machines for products other than food and drink, such as for toiletries, phone charging accessories, etc. that may be useful to patients, visitors, and staff, e.g. for unexpected overnight stays, and at end of trip areas for staff, may also be considered.
- Hand hygiene facilities, such as alcohol-based hand rub, should be provided nearby in line with local infection prevention and control (IPC) policies.
