### Australasian Health Facility Guidelines

Room Data Sheet

## **Fluoroscopy Control Room**

| Room Code          | FLUO-CTRL      |
|--------------------|----------------|
| Briefed Area       | 13.00 m²       |
| Ceiling Height     | 2.7 m          |
| Occupancy          | up to 2 staff  |
| Hours of Operation | Up to 24 hours |

#### **Description**

The Fluoroscopy Control Room provides the space and equipment for remote control of fluoroscopy equipment and amenities for the review of images and reporting. Direct visibility of the patient through an observation window and direct access to the imaging room is required.

## Additional Considerations

- Cable ducts for services between the imaging device and the control area will be required and must be coordinated with the MME vendor. Additional building services connections and outlets are to be coordinated to suit equipment requirements.
- Radiation shielding requirements are to be assessed and advised by a qualified Radiation Consultant to suit the practice, workload and equipment procured, and all shielding on the Standard Component is indicative.
- An 'X-ray in Use' light system is required with signs that are illuminated when the imaging device is on and turned off when it stops. Signs are to be at all doors entering the room.
- The size, quantity and configuration of computer display screens is to be finalised based on the specific image display and processing task requirements (e.g. number of application windows to be viewed concurrently) and ergonomic considerations.

  Providing flexibility of monitor positioning is vital to ensure adjustments are possible to meet the ergonomic requirements of different users.

- Provision of height adjustable workstations or fixed joinery is to be in line with service requirements and local WHS policies.
- Hours of operation depend on the service in which this room is located. Ambulatory medical imaging services may only operate during business hours or extended business hours, some small hospital services may have an on-call, after-hours service. Large units are likely to provide a 24-hour service, especially where a satellite service is provided with an emergency department.
- Requirement for fixed and/or mobile duress to be confirmed to suit service requirements.
- An operational model for responding to calls from staff/patients will be needed to support the inclusion of a nurse call system and is to be determined based on service requirements.
- Provision of an intercom for staff communication within the department is dependent on service requirements. This function may be provided as part of the telephone system.
- The need for and extent of emergency power and UPS must be reviewed to suit site specific requirements and confirmed based on risk assessment considering the impact of a power outage on patient care/safety.

#### **Doors and Windows**

| CODE         | DESCRIPTION   | COMMENT   |
|--------------|---|---|
| DOHI-013.05  | DOOR: hinged, 1 leaf, 900 clear opening, solid, shielded, standard vision panel, lead glass | to imaging room   |
| AFDPR-001.01 | DOOR PROTECTION: kickplate, to 300H   | to control room side  |
| AFDPR-006.01 | DOOR PROTECTION: plate, to 900H   | to imaging room side  |
| DOHI-013.01  | DOOR: hinged, 1 leaf, 900 clear opening, solid, standard vision panel                       | optional - staff entry from corridor  |
| AFDPR-001.01 | DOOR PROTECTION: kickplate, to 300H   | to control room side  |
| AFDPR-006.01 | DOOR PROTECTION: plate, to 900H   | to corridor side, extent dependent on movement of beds and mobile equipment |
| WIFX-008.03  | WINDOW: fixed, internal, single glazed, sill at 1050H, shielded, lead glass                 | for observation from control room   |
| AHWCV-001    | WINDOW COVERING: blind, roller, single  |   |
